

# How to Rectify a Missing, Illegible, Incorrect Shipping Mark for Australian Product in Meat Messaging

## Use Case for Rectifying Missing or Illegible Shipping Marks.

A rejection notice will be issued for cartons that have a missing or illegible shipping mark. If the load is uploaded into Meat Messaging with all carton barcodes attached to the consignment, you will be able to provide this document as evidence to the inspector for re-stamping.

## Why it is possible to Remark Australian Cartons through Meat Messaging in the U.S.

These instructions are related to FSIS Directive 9900.5 Rev. 2 that was released on the 21st of December 2020. Section E Procedures for Correcting Shipping Marks when Using Barcodes, Part 4 / b states “A report provided by the exporters that links the barcodes to the lot identified of the foreign inspection certificate”. Meat messaging provided that report by searching a single barcode and returning the full consignment list of carton barcodes. Refer to: [https://www.fsis.usda.gov/sites/default/files/media\\_file/2021-02/9900.5.pdf](https://www.fsis.usda.gov/sites/default/files/media_file/2021-02/9900.5.pdf).

**IMPORTANT:** The establishment must be FSIS listed to use the directive above to remark missing shipping marks. First view this full list to see if the establishment is eligible to use this protocol here: <https://reports.meatmessaging.info/endorsed-est>
